

Low Profile 1.5-Ton Transmission Jack

This low-profile transmission jack is designed for removing and installing transmissions on vehicles with low ground clearance. It features a 1.5-ton capacity, providing ample support for a wide range of transmissions.

Product Overview

Professional Transmission Support

This low-profile transmission jack is expertly engineered for removing and installing transmissions on vehicles with limited ground clearance. With a robust 1.5-ton (3,000 lbs) capacity, it offers reliable support for a diverse range of transmission types. The unit features an adjustable saddle and mounting brackets for precise positioning, while the hydraulic lift mechanism ensures smooth, controlled operation during critical maintenance tasks.
