

Low Profile Compact Graphics Card

This compact graphics card is designed for small form factor systems. It features a heatsink and fan for cooling, along with DVI, HDMI, and potentially DisplayPort outputs.

Product Overview

Low Profile Compact Graphics Card

This low profile graphics card is engineered for space-constrained environments, making it an ideal choice for small form factor systems. Featuring an integrated heatsink and active fan cooling solution, it ensures reliable thermal management during operation. The card supports a versatile array of connectivity options including DVI, HDMI, and DisplayPort to suit various professional display requirements.
