Overview

Low Profile Material Handling Solutions

These low profile pallet trucks are engineered for warehouses and manufacturing facilities requiring efficient transport of heavy loads with minimal ground clearance. Featuring robust hydraulic systems and high-strength steel construction, these units ensure durability and reliable performance in demanding environments. Designed with ergonomic handles and intuitive controls, they offer precise maneuverability in tight aisles and confined spaces.

Performance Metrics

Load Capacities

1000 kg

WH 10L-35 Capacity

2000 kg

WH 20L-51 Capacity

Key Features

Design Advantages

- Low profile design for easy pallet access
- Ergonomic handle for comfortable operation
- Heavy-duty steel construction
- Intuitive control mechanisms
- Overload protection included
- Controlled lowering speed

Application Areas

Suitable Environments

Warehouses, Manufacturing Facilities, Distribution Centers, Tight Aisles, Confined Spaces
