Product Overview

Professional Low-Speed Masticating Juicer

This low-speed masticating juicer utilizes advanced extrusion technology at 54rpm to minimize oxidation and prevent delamination, ensuring nutrient-rich, high-quality juice. Engineered with a powerful 330W DC copper motor, it offers reliable performance for daily use in commercial or household environments. The user-friendly design features simple forward/reverse controls and easy-to-clean components, making it an essential appliance for health-conscious food preparation.

Technical Specifications

Performance Metrics

330 W

Motor Power

54 rpm

Operating Speed

80 db

Noise Level

Electrical Compatibility

- 220-240V / 50-60Hz
- 100-120V / 60Hz

Features and Build

Construction Details	Durable ABS injection molded body with non-slip rubber feet for operational stability.
Juice Container Capacity	800 ml

Certifications

Regulatory Certifications	ETL, CETL, CE, CB, GS, RoHS, LFGB, REACH
