Product Overview

Professional Masticating Juicer

This high-performance low-speed juicer utilizes advanced extrusion technology to provide non-oxidized, nutrient-rich juice without delamination. Engineered with a powerful 330W DC copper motor, it ensures efficient extraction while maintaining a quiet operation of 80dB. The user-friendly design includes a digital LED display and three-speed control, making it an ideal choice for both professional environments and home use.

Technical Specifications

Extrusion Speed

54 rpm
Speed

Power Rating	330 W
Motor Type	DC Copper Motor
Juice Cup Capacity	800 ml
Noise Level	80 dB
Supported Voltages	220-240V 50-60Hz, 100-120V 60Hz

Certification & Quality

Compliance Standards

ETL • CETL • CE • CB • GS • RoHS • LFGB • REACH

Logistics & Shipping

Container Loading Quantities

Container Type	Capacity (Units)
20'GP	700
40'GP	1400
40'HQ	1670
