

Low Speed Masticating Juicer

This slow juicer extracts juice from both hard and soft produce, including leafy greens. Its low-speed operation minimizes heat and oxidation to preserve nutrients.

Product Overview

Efficient Nutrient Extraction

This slow-speed masticating juicer is specifically engineered to maximize juice yield from a wide variety of fruits and vegetables. By utilizing a low-speed motor, it minimizes heat generation and oxidation, ensuring that essential nutrients and enzymes remain intact in every glass. Its thoughtful design prioritizes both operational convenience and maintenance, making it an ideal choice for professional or personal use.

Technical Specifications

Operational Features

- Continuous juicing capability via wide feeding chute
- Reverse function to prevent clogging
- Easy assembly and disassembly for maintenance
- Compact countertop design
