Product Overview

Professional Low-Speed Masticating Juicer

This advanced low-speed masticating juicer is engineered for maximum nutrient retention and minimal oxidation, ensuring high-quality juice output. Featuring a robust 150W motor operating at a precise 60RPM, it efficiently extracts juice while maintaining quiet operation. The design incorporates a convenient pulp separation system and a clear, marked container for easy measurement.

Technical Specifications

Rated Power	150 W
Operating Speed	60 RPM
Available Voltage	110-120V, 220-240V
Frequency	50/60Hz
Model Number	F-9006

Key Features

Key Capabilities

- Low-speed auger extraction
- Effective pulp separation
- Quiet motor operation
- Container with volume markings
