

Low Speed Masticating Juicer

This slow juicer efficiently extracts juice from various fruits and vegetables. Its low-speed operation minimizes heat and oxidation, preserving nutrients and enzymes for healthier juice.

Product Overview

Professional Low Speed Masticating Juicer

This masticating juicer is engineered to preserve essential nutrients and enzymes through its low-speed extraction process. It features a robust 200W motor designed to efficiently separate pulp while minimizing noise levels. With its detachable components and generous collection capacity, it offers both ease of maintenance and high-volume performance for commercial or professional settings.

Performance Metrics

Power Consumption

200 W
