

Low Speed Masticating Juicer

This slow juicer efficiently extracts juice from various fruits and vegetables. Its low-speed motor minimizes heat and oxidation to preserve nutrients and enzymes.

Product Overview

Professional Masticating Technology

This low-speed masticating juicer is engineered to provide superior juice extraction by minimizing heat and oxidation during the process. Its efficient motor ensures better preservation of food flavor and essential nutrients, making it ideal for both fruits and vegetables. Designed with convenience in mind, the unit features detachable components that are simple to clean, along with dedicated collectors for juice and pulp.

Technical Specifications

Power Performance

200 W

Power Output

Voltage & Frequency

220-240V~50/60Hz

Capacity & Design

Container Capacities

Component	Capacity
Juice Cup	0.8L
Residue Cabinet	0.8L

Key Features

Highlighted Benefits

Low Noise Operation, Low Speed Extraction, Detachable Components, High Nutrient Retention
