Product Overview

Low-Speed Masticating Juicer

This high-efficiency masticating juicer utilizes low-speed auger technology to maximize nutrient retention and minimize oxidation during the extraction process. Designed for professional and home use, it features a quiet 150W motor and a user-friendly assembly for efficient juice and pulp separation. The durable construction and built-in safety lock mechanism ensure a reliable and convenient experience for all your juicing needs.

Technical Specifications

Rated Power	150 W
Operating Speed	60 RPM
Voltage Compatibility	110-120V, 220-240V
Frequency	50/60Hz
Model	F-9005

Design & Features

Key Features

- Low-speed auger technology
- Quiet motor operation
- Safety lock mechanism
- Dual juice and pulp outlets
- Easy-to-clean design
