Product Overview

Low Tension Fuse Switch

This low tension fuse switch is designed for reliable circuit protection in industrial, commercial, and residential applications. Engineered to meet IEC60947-3 standards, it effectively combines switchgear functionality with overcurrent and short-circuit protection. The unit is suitable for outdoor installation and features robust construction using high-quality materials for long-term durability.

Technical Standards

Compatible Fuse Links

- Blade contacts size 0, 1, 2
- Bolted connection size B0, B1, B2, B3, B4

Applicable Standards

IEC60947-3, IEC60269-2-1

Construction & Installation

Materials

Porcelain • Bronze • Galvanized Steel • Stainless Steel

Installation

Outdoor, horizontal underhung position on 100x100 mm cross-arm

Logistics & Ordering

Standard Lead Time

35 days

Packaging

1 or 3 pcs per foam-lined carton, palletized
