

Lowboy Trailer for Heavy Machinery Transport

This lowboy trailer is designed for transporting heavy construction machinery. It features multiple axles for heavy load distribution and support legs for stability.

Product Overview

Heavy-Duty Transport Solution

This lowboy trailer is expertly engineered for the secure transport of heavy construction machinery, including loaders, excavators, and bulldozers. Its flatbed design and multi-axle configuration ensure optimal load distribution for heavy equipment. Equipped with integrated support legs, the trailer maintains stability even when detached from the tractor unit.

Technical Specifications

Design Features

- Flatbed design
- Multi-axle configuration
- Integrated support legs

Suitable Cargo

Loaders, Excavators, Bulldozers, Heavy Construction Machinery

Stability System

Yes
