

LPG Dispenser with Digital Display

This LPG dispenser provides accurate and reliable dispensing of liquefied petroleum gas. Its digital display shows the sale amount, liter count, and price.

Product Overview

Professional LPG Dispensing Solution

This LPG dispenser is engineered for high-precision fuel management in commercial and industrial fueling environments. It features a robust digital interface that clearly displays critical transaction data including sale amount, total volume in liters, and unit price. Designed for durability, the unit is constructed from heavy-duty materials to withstand demanding outdoor conditions while ensuring reliable and accurate dispensing operations.
