

LPG Single-Fuel Air-Conditioned City Bus

This is a single-fuel LPG air-conditioned city bus. It features an LPG engine designed for complete and cleaner combustion, along with a protective barrier on the LPG tank.

Overview

Clean Energy City Transit

The GZ6105SV series is a dedicated single-fuel LPG air-conditioned city bus designed for efficiency and environmental compliance. By utilizing liquefied petroleum gas, the vehicle achieves more complete and cleaner combustion compared to traditional fuels. Safety is prioritized through the integration of a protective barrier specifically installed on the LPG tank.

Technical Specifications

Fuel Type	LPG (Liquefied Petroleum Gas)
Fuel Configuration	Single-fuel
Model Series	GZ6105SV

Safety & Features

Safety Features	LPG Tank Protective Barrier, Air-Conditioned
