

LSY Series Screw Conveyor

The LSY Series Screw Conveyor is engineered for efficient material handling. Its robust design features a helical screw within a tubular housing, powered by an electric motor for horizontal or inclined material movement.

Overview

Efficient Bulk Material Handling

The LSY Series Screw Conveyor is engineered for the reliable transport of bulk solids, including powders and granules. Featuring a robust helical screw enclosed within a durable tubular housing, it is designed to maintain consistent flow rates during operation. The unit is powered by an electric motor and finished with a corrosion-resistant coating, making it suitable for demanding industrial environments.

Technical Specifications

Finish

Corrosion Resistant • Industrial Paint

Conveyor Type

Tubular Screw Conveyor

Suitable Materials

Powders, Granules, Bulk Solids
