

M5X130 Fastener Screw

The M5X130 screw is a fastener designed for secure connections. Its dimensions ensure compatibility within mechanical assemblies.

Product Overview

Precision Fastening Solution

The M5X130 fastener screw is engineered for secure and reliable assembly in demanding mechanical applications. With a nominal diameter of 5mm and a length of 130mm, this component is designed to provide consistent performance and structural integrity. It is an essential hardware element for professional industrial and mechanical assembly projects.

Dimensions

Nominal Diameter	5 mm
Length	130 mm

Technical Specifications

Thread Size	M5
