Product Overview

Professional Hydraulic Grease Fitting

This M6 precision-machined grease fitting is designed for high-performance hydraulic lubrication applications. Featuring a robust four-jaw design and galvanized steel construction, it ensures a secure, leak-free connection for efficient machinery maintenance. Ideal for industrial and automotive environments, this component provides reliable service life and ease of operation.

Technical Specifications

Wrench Size	13 mm
Overall Length	36 mm
Diameter	15 mm
Connection Type	G 1/8" female
Compatible Nipples	H-nipples
Coupler Design	4 Jaws, turned

Material and Build

Material	Steel, Galvanized
Weight	0.05 kg
