

Machine Tool Component with Mounting Brackets

This machine tool component features a durable, compact design with integrated mounting brackets. It incorporates a PVC fitting for fluid connection and a sealed electrical cable entry point, suitable for demanding industrial applications.

Overview

Industrial Machine Tool Component

This compact and robust machine tool component is engineered for reliability in demanding industrial environments. It features a durable black cylindrical housing with integrated mounting brackets, ensuring secure and straightforward installation. Designed for efficiency, the unit includes a specialized white PVC fitting for fluid connection and a sealed electrical cable entry point, making it a dependable choice for critical machinery setups.

Technical Specifications

Housing Type	Cylindrical
Housing Color	Black
Mounting Style	Integrated Mounting Brackets

Connectivity

Fluid Connection Type	White PVC Fitting
Cable Entry	Sealed

Features

Key Features	Compact Design, Robust Construction, Industrial Grade, Sealed Entry
