

Machine Tool Control Panel

This industrial machine tool control panel has an integrated display and input interface. It is designed for precise control and monitoring of machining operations.

Product Overview

Industrial Machine Tool Control Panel

This industrial control panel is designed for the precise monitoring and operation of machining equipment. It features an integrated display screen providing real-time coordinate data and system status updates. The interface includes a dedicated numerical keypad and directional controls to ensure efficient operator input during complex machining tasks.

Interface & Controls

Input Methods

Numerical Keypad, Directional Controls, System Status Keys

System Capabilities

Axis Support

- X-Axis
- Y-Axis
- Z-Axis
- A-Axis
- C-Axis

Real-time Monitoring

88.8888 mm

Coordinate Precision

42.63 deg

Angular Position

Status Indicators

Coordinate Data • System Status • Machining Operations
