

Machine Tools

Machine tools are used for cutting, shaping, and finishing metal and other materials. They play a crucial role in manufacturing, enabling precise and efficient material processing.

Facility Overview

Professional Aquatic Facility

This indoor swimming pool facility is designed to meet professional standards, featuring clearly defined swimming lanes for competitive or training use. The spacious environment is enhanced by a high, curved ceiling and bright, uniform lighting to ensure optimal visibility. With integrated spectator seating and large-scale digital display capabilities, this venue is well-equipped to host events and training sessions.
