

Machinery Moving Dolly with Swivel Casters

This low-profile dolly is designed for transporting heavy equipment and industrial parts. It features a rectangular platform with a non-slip surface and swivel casters for easy maneuverability.

Product Overview

Industrial Machinery Moving Solutions

This low-profile machinery moving dolly is engineered for the safe and efficient transport of heavy industrial equipment and parts. Designed with a durable rectangular frame, it features a non-slip surface to ensure load stability during transit. Equipped with high-maneuverability swivel casters, this skate is an essential tool for textile, apparel, and general industrial logistics operations.

Technical Specifications

Caster System	Swivel Casters
Key Features	Low-profile, Non-slip surface, Swivel mobility

Application

Suitable Industries

- Apparel Machinery
- Textile Machinery
- General Industrial Manufacturing
