

Machinery Moving Dolly

This machinery mover has a capacity from 3 tons to 100 tons. It can move almost any equipment required for relocation or installation.

Overview

Industrial Machinery Moving Solutions

Designed for heavy-duty machinery moving and factory relocation, these machine skates offer a safer and more efficient alternative to traditional rollers. With a versatile capacity range from 3 tons to 100 tons, they are suitable for moving and installing almost any heavy equipment. The system features interchangeable wheel materials to suit specific floor conditions and load requirements.

Performance Specifications

Load Capacity Range

3 tons Minimum Capacity	100 tons Maximum Capacity
-----------------------------------	-------------------------------------

Wheel Material Characteristics

Material	Key Benefit
Polyurethane (PU)	Protects cement floors, leaves no marks
Steel	High strength and durability

Available Wheel Materials

Nylon, Steel, Polyurethane (PU)

Design Features

Key Design Features

- Heavy-duty steel construction
- Non-slip rubber top surface
- Smooth-rolling casters
- Integrated handle for control and leverage
