Product Overview

Industrial Machinery Moving Solution

This professional-grade equipment roller skates kit is engineered for the safe and efficient transport of heavy machinery and industrial cargo. Featuring a robust steel construction with a powder-coated finish, these skates are built for durability and long-term reliability in demanding environments. The design includes specialized features like rubberized grip surfaces and floor-protecting polyurethane wheels to ensure both load stability and facility safety.

Key Features

Construction Material	Steel with powder-coated finish
Wheel Material	Polyurethane
Top Surface	Rubber surface for extra grip
Maneuverability	Steerable, Straight-line movement, Rotating top plate

Performance Metrics

Expected Service Life

5 years

Minimum Years

Floor Protection	Yes
------------------	-----

Usage & Application

Ideal Applications

- Heavy machinery transport
- Industrial equipment positioning
- Cargo trolley operations
- Warehouse load relocation
