

Machinery Moving Skates with Rotating Top

These machinery moving skates facilitate the transport of heavy equipment. The skates feature a rotating top that allows for easy steering and precise positioning.

Overview

Industrial Machinery Moving Skates

These heavy-duty machinery moving skates are designed for the safe and efficient transport of massive loads ranging from 3 to 1000 tons. Engineered for stability and rigidity, they protect flooring surfaces while ensuring precise maneuverability. With a durable construction built to last over ten years, these dollies are an essential solution for industrial applications, manufacturing facilities, and warehouses.

Technical Specifications

Load Capacity Range

3 tons Minimum Capacity	1000 tons Maximum Capacity
-----------------------------------	--------------------------------------

Available Wheel Materials

Polyurethane, Nylon, Alloy Steel

Usage & Compatibility

Application Guidelines

- Use on flat, stable surfaces
- Place steel plates on the floor for protection
- Utilize U-bars for optimal load distribution
- Can be mixed and matched to fit oddly shaped loads

Service Life

10+ Years Durability
