

Machinery Run-Out Table

This run-out table provides support for long workpieces. Its adjustable supports and rollers ensure smooth material handling.

Product Overview

Material Handling Solution

The Machinery Run-Out Table is designed to optimize material flow by providing stable, friction-reduced support for long workpieces as they exit industrial machinery like saws or rollers. Featuring a robust steel frame and adjustable leveling supports, this table ensures precise alignment and safe handling during the production process. The integrated roller system significantly minimizes surface damage to materials, enhancing both the safety and quality of your processing operations.

Technical Specifications

Suitable Applications

- Saw outfeed support
- Roller conveyor extensions
- General material handling

Construction Material	Steel
Finish Color	Blue
Key Features	Adjustable Supports, Roller System, Leveling Capability, Heavy Duty Frame
