

Machinery Sealing Gasket

This gasket is designed to create a tight seal between two surfaces in machinery. Its durable construction ensures a reliable barrier against leaks and contaminants in various industrial applications.

Product Overview

Industrial Machinery Sealing Gasket

This high-performance sealing gasket is engineered to provide a reliable barrier against leaks and contaminants in demanding industrial machinery environments. Designed for precision, the gasket features multiple bolt holes and intricate cutouts to ensure optimal alignment and secure attachment between mating surfaces. Constructed from a durable rubber and fiber composite, it is built to withstand significant variations in pressure and temperature, ensuring long-term operational integrity.

Technical Specifications

Key Features

- Multiple bolt hole design for secure attachment
- Engineered for pressure and temperature resistance
- Precise cutouts for optimal seal alignment

Material Type	Rubber and fiber composite
Visible Markings	A28 F, CEL, 3
