

Machining Tool Set

Precision tool set designed for machining applications. It includes a dial indicator, cylindrical rods, tool holders, mounting blocks, fasteners, and hex keys.

Overview

Professional Machining Tool Set

This precision machining tool set is designed for professional applications in metalworking and engine maintenance environments. The kit includes a comprehensive array of components such as a dial indicator for high-accuracy measurements, multiple cylindrical rods, and specialized tool holders. Engineered for versatility and efficiency, it provides the necessary equipment for complex setup and adjustment tasks.

Technical Details

Included Components

- Dial indicator
- Cylindrical rods (varying lengths)
- Specialized tool holders
- Adjustable mounting blocks
- Small fasteners
- Hex keys

Primary Applications

Machining, Tooling, Metalworking, Engine Maintenance

Performance

Precision Features

High Precision • High Efficiency • Cost Effective
