Product Overview

German Type Machinist Hammer

This German-type machinist hammer is a versatile tool engineered for precision and durability in metalworking and general striking applications. Featuring a forged steel head that is hardened and tempered, it delivers clean, accurate strikes for shaping, bending, and riveting tasks. Buyers can choose between a traditional hardwood handle or a modern fiberglass handle, both designed for optimal balance, control, and reduced user fatigue.

Technical Specifications

Available Head Weights

- 100g
- 200g
- 300g
- 400g
- 500g
- 800g
- 1000g

Handle Material Options

Wooden, Fiberglass

Design Features

Head Construction

Drop-forged steel • Hardened • Tempered • Polished face

Handle Features

Handle Type	Key Characteristics
Wooden	Straight-grained, ergonomic, shock-absorbing
Fiberglass	Dual-material, textured grip, high visibility
