

Magnetic Button Components for Whiteboards

These components are designed for creating magnetic buttons. The set includes metal button shells, clear plastic covers, magnetic backings, and paper inserts.

Product Overview

Magnetic Button Components

These versatile magnetic button components provide a sturdy, professional foundation for creating custom designs suitable for any metal surface. Each set includes a high-quality metal shell, protective mylar film, and a durable plastic backing with a strong neodymium magnet. Ideal for promotional items, souvenirs, or office organization, these components are fully compatible with a wide range of professional manual and pneumatic button-making machines.
