

Magnetic Drill Press

This magnetic drill press is designed for drilling large diameter holes in steel. It features a strong magnetic base for secure attachment to the workpiece, ensuring accurate and stable drilling.

Overview

Professional Magnetic Drill Press

This high-performance magnetic drill press is engineered for precision and durability in demanding industrial environments. Featuring a robust 1200W motor and powerful 13000N magnetic adhesion, it ensures stable and accurate drilling into steel workpieces. Its compact, lightweight design enhances portability, making it an ideal solution for construction, fabrication, and maintenance tasks where reliability is paramount.

Technical Specifications

Motor Power	1200 W
Voltage Options	230V/50Hz, 120V/60Hz
No Load Speed	595 rpm
Magnetic Adhesion	13000 N
Net Weight	13.5 kg

Drilling Capabilities

Hole Cutting Capacity	35mm diameter x 50mm deep
Twist Drilling Range	1.5 – 13mm diameter
Tool Holder Size	19.05 mm
Stroke Length	190 mm
