

Magnetic Drill Press 50 mm Capacity

This magnetic drill press is designed for drilling large diameter holes in steel. It features a strong magnetic base for secure attachment to the workpiece and variable speed control for optimal performance.

Product Overview

High-Performance Magnetic Drill Press

This 50mm capacity magnetic drill press is a robust and versatile tool engineered for heavy-duty drilling tasks in steel and ferrous materials. Featuring a high-torque 1200W motor and a secure magnetic base, it ensures stability and precision for both on-site and workshop applications. Equipped with variable speed control and an integrated coolant system, this drill offers optimal performance and extended tool longevity.

Technical Specifications

Max Drilling Capacity	50 mm
Motor Power	1200 W
Voltage	220 V
Weight	20 kg

Features

Key Features

- Variable speed control
- Thermal overload protection
- Integrated coolant system
- Strong magnetic base

Compatible Cutting Tools	Twist drills, Core drills, Taps
--------------------------	---------------------------------

Application

Ideal Applications

Construction • Fabrication • Industrial
