

Magnetic Drill Press

This magnetic drill press is designed for drilling large diameter holes in steel and other ferrous materials. It has a strong magnetic base that securely attaches to the workpiece for stability.

Overview

Industrial Magnetic Drill Press

The KCY-150/4WD Magnetic Drill Press is a high-performance industrial tool engineered for heavy-duty drilling tasks in steel and ferrous materials. Featuring a robust 3080W motor and a powerful 21800N magnetic base, it ensures superior stability and precision for large-diameter drilling and tapping operations. This versatile unit offers variable speed control across four ranges, making it an essential asset for construction, fabrication, and maintenance professionals.

Performance & Capacity

Drilling Capabilities

130 mm

Max Core Drill

32 mm

Max Twist Drill

120 mm

Cutting Depth

No-load Speed Ranges

- 35-100 RPM
- 55-160 RPM
- 170-460 RPM
- 270-720 RPM

Tapping Capacity

M24

Power & Mechanics

Power Output	3080 W
Magnet Adhesion	21800 N
Voltage Compatibility	110V, 220V, 230V, 240V

Physical Dimensions

Weight Specifications

Type	Weight
Gross Weight	31 kg
Net Weight	23.5 kg

Drill Stroke	310 mm
Packing Size	75 x 20 x 47 cm
