

Magnetic Field Probe for Measurement

This magnetic field probe is designed for measuring magnetic fields. Its compact and portable design makes it suitable for diverse applications requiring magnetic field detection.

General Overview

Magnetic Field Detection

The AZ530-M is a professional-grade magnetic field probe engineered for precise measurement and detection tasks. This compact, portable device is designed for seamless integration with external instrumentation, making it an ideal tool for field technicians and lab environments. Its robust construction ensures reliable performance across a variety of magnetic field monitoring applications.

Technical Specifications

Model Identifier	AZ530-M
Probe Type	Magnetic Field Probe

Features

Design Highlights	Compact, Portable, Connector-equipped
Integration	Yes
