

Magnetic Levitation Display Stand with LED Lighting

This levitating display stand uses magnetic levitation to float items in the air, offering a visually appealing presentation. It features a rotating platform and LED lighting to accentuate the displayed object.

Product Overview

Innovative Levitation Technology

This magnetic levitation display stand creates a captivating, mid-air presentation for high-value items, utilizing advanced suspension technology to rotate objects smoothly. Integrated LED lighting enhances the visual impact, making it an ideal solution for showcasing jewelry, collectibles, or premium electronic devices. Designed for professional retail and display environments, the unit offers adjustable levitation height and reliable AC-powered operation.
