

Magnetic Motor Starter

These magnetic starters are engineered for dependable motor control in industrial settings. They provide robust performance and protection for motors, ensuring safe and efficient starting and stopping.

Product Overview

Industrial Motor Control

These magnetic motor starters are engineered for reliable motor control in demanding industrial environments. Designed to offer robust performance and essential motor protection, they facilitate safe and efficient starting and stopping operations. The series supports various models, ensuring compatibility across a wide range of motor types and operational requirements.

Technical Specifications

Available Models

- QCXS-125
- WQC-18

Compliance Standards

IEC 947-4-1

Performance Metrics

Key Performance Metrics

125 A

Max Current Capacity (QCXS)

18 A

Max Current Capacity (WQC)
