

# Magnetic Mount Ultra-Wide Band 2G/3G/4G Antenna

This high-gain, magnetic mount antenna supports LTE, 2G, 3G, and 4G cellular bands. Its ultra-wideband design ensures compatibility with a wide range of cellular frequencies.

## Product Overview

### High-Performance Cellular Connectivity

This high-gain, magnetic mount antenna is engineered to support a broad spectrum of cellular bands, including LTE, 2G, 3G, and 4G. Its ultra-wideband design ensures reliable connectivity and improved signal strength, even in areas with weak coverage. With a rugged construction and a secure magnetic base, it is an ideal solution for both vehicle-based and fixed-location deployments in demanding environments.

## Technical Specifications

### Design

Ultra-wideband • High-gain

Supported Networks	2G, 3G, 4G, LTE
Mounting Method	Magnetic base

## Application & Usage

### Deployment Scenarios

- Vehicle deployments
- Fixed location deployments
- Areas with weak cellular coverage

Durability	Rugged construction for harsh environments
------------	--
