

Magnetic Separator Gate

This high-intensity magnetic separator gate efficiently removes ferrous contaminants from free-flowing materials. It features durable stainless steel housing and powerful rare earth magnets for optimal separation in various industrial applications.

Product Overview

High-Performance Magnetic Separation

This high-intensity magnetic separator gate is engineered for the efficient removal of ferrous contaminants from free-flowing materials. Built with a durable stainless steel housing and high-power rare earth magnets, it delivers exceptional separation performance across demanding industrial environments. The smooth, sanitary construction facilitates straightforward cleaning and maintenance, ensuring consistent reliability for food processing, pharmaceutical, chemical, and plastics applications.

Technical Features

Construction Material	Stainless steel
Magnet Type	Rare earth magnets

Industry Suitability

Suitable Industries	Food Processing, Pharmaceutical, Plastics, Chemical
---------------------	---

Maintenance

Design Advantages

- Sanitary design for easy cleaning
- Robust construction for long-term reliability
- High-intensity separation performance
