Product Overview

Versatile Magnetic Construction System

This magnetic construction toy offers a highly versatile platform for creative design, stress relief, and educational exploration. Consisting of numerous high-strength individual magnetic components, it allows users to assemble complex geometric shapes, spherical clusters, and custom structures. Perfect for demonstrating magnetic principles and enhancing spatial reasoning, this set serves as an engaging tool for both professional environments and educational settings.

Technical Specifications

Primary Applications

- Stress relief
- Creative construction and design
- Educational demonstrations
- Spatial reasoning development

Available Forms

Spheres • Cubes

Material Type

Magnetic, Neodymium

Color Availability

Silver, Multi-colored
