Integrated Safety Suite

- High temperature battery protection
- Short circuit protection with auto-cutoff
- Overvoltage regulation
- Electromagnetic field protection
- Overcharge and Overpower protection
- Overdischarge prevention

Physical Properties

Materials Used

Zinc Alloy, Brass, Metal

Usage Information

Charging Conditions

To ensure optimal performance, the device requires a QC-compatible charger. For best results and proper magnetic attachment, it is recommended that the mobile phone be used with a silicone shell during the charging process.
