Product Overview

Magnetic Welding Positioner

This professional-grade magnetic welding holder is engineered to securely hold ferrous metal workpieces during welding, brazing, and assembly tasks. Constructed from heavy-duty steel with durable riveted assembly, it provides a stable and precise foundation for complex fabrication projects. Its versatile design allows for multiple angle settings, ensuring high accuracy and efficiency in various professional welding environments.

Technical Specifications

Design Features

Corrosion resistant finish • Riveted construction • Compact design

Supported Angles	30°, 45°, 60°, 75°, 90°, 135°
Material	Heavy-duty steel
Size	80 mm

Applications

Suitable Applications

- Welding
- Brazing
- Metal assembly
- Fabrication
