

# Maize Grits Milling Machine

This maize grits milling machine processes maize into various products like flour, grits, and bran. The equipment features interconnected machines including grinders, sifters, and separators for efficient milling and separation.

## ADDITIONAL IMAGES

## Overview

### Industrial Maize Processing System

This professional-grade milling system is designed for high-volume, industrial-scale production of maize flour, grits, and bran. Featuring a multi-stage process with integrated grinders, sifters, and separators, the equipment ensures consistent output quality. The robust steel-framed system utilizes advanced pneumatic conveying and gravity-fed mechanisms to streamline production from raw grain to packaged product.

## Technical Capabilities

### Integrated Components

- Grinders
- Sifters
- Separators
- Elevators
- Pneumatic Conveying System
- Bagging Stations
- Control Panels

### Primary Outputs

Maize Flour, Maize Grits, Maize Bran

## Service & Support

### Warranty Coverage

1 Year Quality Guarantee • 1 Year Free Spare Parts

### Support Services

- Special Design
- Installation
- Commissioning
- Worker Training
- Lifelong Technical Service

## Global Reach

### Exported Regions

#### Region

Australia, America, Canada, Belgium

Egypt, Algeria, Zambia, Congo, Kenya, Ethiopia, Uganda, Tanzania

Yemen, Tajikistan, Afghanistan, Vietnam, Israel, Mozambique, Kazakhstan
