

Malleable Wire Rope Clip, Austria Type, Zinc Plated

Malleable wire rope clips are designed to the Austria type standard. These clips are zinc plated for corrosion resistance and used for creating loop terminations or connecting wire ropes.

Product Overview

Austria Type Malleable Wire Rope Clips

These malleable wire rope clips are manufactured according to the Austria type standard, providing a reliable solution for creating loop terminations or connecting two wire ropes. Featuring a zinc-plated finish, they offer essential corrosion resistance for various industrial environments. The malleable construction is engineered for durability and consistent strength under load, ensuring secure connections for your wire rope assemblies.
