

Manual Arc Welding Electrode Holder

This electrode holder is designed for manual arc welding processes. It is constructed with high-quality materials, ensuring optimal electrical conductivity and heat resistance.

Product Overview

Professional Arc Welding Solution

The JS-EH14 is a robust and reliable electrode holder designed for manual arc welding processes. Constructed with high-quality materials, it ensures optimal electrical conductivity and heat resistance for a safe and efficient welding experience. Its ergonomic handle offers a comfortable grip, reducing operator fatigue, while the secure clamping mechanism allows for precise control and consistent arc stability in demanding industrial environments.

Technical Features

Application	Fabrication, Repair, Maintenance, Manual Arc Welding
Ergonomic Design	Yes

Performance

Key Performance Attributes

1 High

Heat Resistance

1 Optimal

Conductivity

Compatibility

Electrode Support

- Various diameters
- Secure grip mechanism

Quality & Compliance

Target Users

Professional Welders • DIY Enthusiasts
