

Manual Bench Grinder

This hand-operated grinder features a durable cast iron body and a grinding wheel. It is designed for sharpening and shaping tools with precision.

Product Overview

Manual Bench Grinder

This manual bench grinder is a reliable, hand-operated tool designed for sharpening and shaping metal tools in environments where electrical power is unavailable. It features a robust cast iron body for stability and durability, ensuring precise control during operation. The unit is supplied with a grinding wheel and utilizes an enclosed gear system for smooth performance in workshops or on-site applications.
