

Manual Brick Cutter with Steel Frame

This manual brick cutter is designed for precise and efficient cutting of bricks and blocks. It features a robust steel frame for stability and durability, ensuring accurate cuts every time.

Product Overview

Professional Manual Brick Cutter

This manual brick cutter is engineered for precise and efficient cutting of various brick and block types. Built with a robust steel frame, it provides the stability required for consistent accuracy on any job site. The unit features an ergonomic handle and adjustable cutting height to optimize user comfort and versatility, helping to minimize material waste and improve productivity.

Certifications

Compliance and Standards

CE, ISO 9001:2000

Technical Features

Design Advantages

- Adjustable cutting height
- Ergonomic handle for reduced fatigue
- Compact and portable design
- Sharp cutting blade for clean finishes

Construction Material

Steel Frame

Application

Suitable Environments

On-site Construction • Workshop Use
