

Manual Button Maker

This manual button maker is designed for creating custom buttons. It features a lever-operated pressing mechanism with a sturdy base.

Overview

Professional Manual Button Maker

This manual button making machine features an all-metal construction, ensuring a strong and sturdy build for reliable performance. Designed for versatility, it supports interchangeable molds in various diameters, allowing for the creation of diverse products like LED signs, clocks, photo stands, and memo boards. The intuitive two-step operation process enables efficient production with a cycle time of approximately 20 seconds.
