Overview

Versatile Manual Lifting Solution

The HSZ manual chain hoist is a portable and robust lifting device designed for reliable performance in diverse environments, including factories, mines, construction sites, and warehouses. Engineered for ease of use, it features a compact structure that allows for efficient operation in confined spaces and is ideal for scenarios where electric power is unavailable. This hoist ensures safety and precision in vertical lifting tasks, making it an essential tool for machinery installation and general loading and unloading operations.

Technical Specifications

Rated Capacity

2 ton

Capacity

Material Composition

- High-strength alloy steel load chain
- Durable steel housing
- Double-pawl braking system

Safety Certifications

CE, GS, TUV Rheinland

Applications

Typical Applications

- Machine installation
- Factory and warehouse material handling
- Construction site lifting
- Outdoor loading and unloading
- Mining operations
