

Manual Chain Hoist

These chain hoists are designed for lifting applications, with models ranging from 1 ton to 10 ton capacity. They feature a robust braking mechanism for secure load holding and precise control.

Overview

Professional Manual Chain Hoist

This manual chain hoist is engineered for high-performance lifting applications in demanding environments. Featuring a robust design with high-strength steel components, it ensures reliable operation and safety during heavy-duty tasks. The hoist utilizes advanced assembly technology to provide high efficiency and precise control, making it a preferred choice for construction, manufacturing, and maintenance professionals.

Technical Specifications

Available Capacities

- 1 Ton
- 2 Ton
- 3 Ton
- 5 Ton
- 10 Ton

Construction Features

High-strength alloy steel, Pressed gear design, Robust braking mechanism
