

Manual Chain Hoist

This manual chain hoist offers safe and easy operation with high mechanical efficiency. Its lightweight and compact design ensures portability and durability.

Overview

Versatile Manual Lifting Solution

The HS series chain hoist is an easy-to-use manual lifting machine designed for industrial and construction environments. It is ideal for loading and unloading cargo in factories, mines, warehouses, and docks, particularly in locations without access to power supply. This robust hoist is compatible with various hand monorail systems, overhead cranes, and jib cranes for seamless material transport.

Technical Specifications

Rated Capacity

1 Ton

Capacity

Model Series

HS-C

Standard Lift Height

3 m

Applications

Suitable Environments

Factories, Mines, Construction Sites, Warehouses, Docks, Agricultural Production

Compatibility

System Compatibility

- Hand monorail traffic systems
- Hand lifting and transport cars
- Monorail overhead transport
- NRK single girder overhead cranes
- Jib cranes
