Overview

Professional Manual Chain Hoist

The CB-style manual chain hoist is a classic, high-performance lifting solution designed for industrial reliability. Engineered with a robust gearbox and reinforced frame, this hoist features a double-pawl safety brake system and high-strength, heat-treated chains for maximum durability. Ideal for construction sites and workshops, it provides precise control and enhanced safety for heavy-duty lifting applications.

Technical Specifications

Safety Features

- Double-pawl safety brake structure
- High-strength heat-treated chain
- Anti-loss of control mechanism on main plate
- Sealed bearings in lifting sprocket groove
- Sprocket side protrusions to prevent hand zipper misplacement

Available Capacities

1000 kg, 2000 kg, 5 Ton

Construction

Build Quality

- Reinforced frame with four long shafts and four support rods
- Sturdy gearbox protection
- Widened hook opening for easier operation

Compliance

CE Certified
